Agriwash

mini

A compact, highly-mobile disinfecting system

Automatically activated drive-over system which can be easily installed and relocated.

Comprising of low-profile entry and exit ramps, spray bars, entry sensor and a high-performance chemical dosing unit with pump and control panel mounted on a 160L header tank. Upon activation, strategically positioned nozzles, situated along the base and side bars, spray every part of the vehicle, ensuring total coverage. Up to 1 bar of pressure can be delivered from the nozzle, allowing for consistency in adverse weather conditions or remote sites. The spray cycle is also adjustable to suit specific site requirements.

The Agriwash Mini is adaptable to use most commonly used disinfectants, acid or alkaline, with adjustable spray cycle to suit specific site requirements. Requiring only a 240v power source and mains water connection, this highly versatile system is perfect for smaller sites.

Key points

The Agriwash Mini may be small in size, but it is unparalleled in reliability and performance.

- Quick deployment
- Simple and robust
- Automatic
- 160L water drum
- Single phase electrical control panel mounted on stand

UP TO 2 BAR

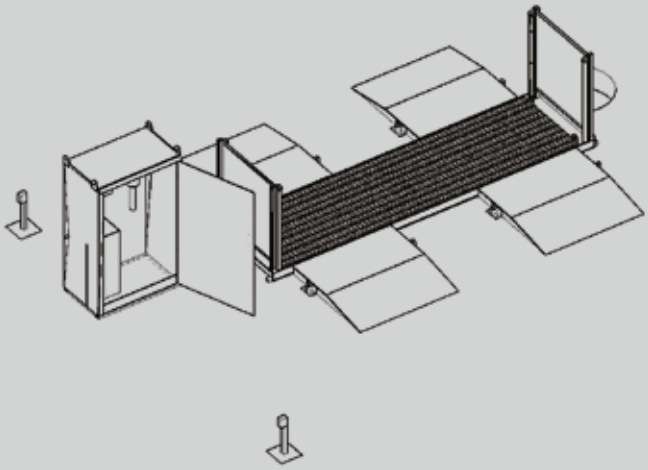
240 V, SINGLE PHASE

MOBILE

NO CIVILS

EASY MAINTENANCE

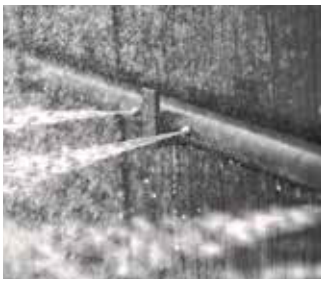
NO OPERATOR



Specifications

Section	Sizes
Wash Pipework Frame	4180mm x 1000mm x 100mm 600 kg, 350 Litres Capacity
Ramps (x4)	1150mm x 1000mm x 125mm 125kg (each)
Wash Pump	1 kw, 90 L/min.
Pump and Controls Stand	1615mm x 1080mm x 610mm 210kg.
Water requirement	15mm or 1/2" mains feed
Power requirement	240v, Single phase

Suitable for all vehicle types



Targeted spray for maximum effectiveness

Adjustable dosing

Inset option

Customer Requirements

- Compacted level hardcore or concrete / tarmac base for the system and associated ramps and tanks
- A constant mains water supply for installation and operation
- Disinfectant readily available for testing
- Nominated site personnel to be available for training

Additional Information

we supply:

- Free of charge site consultations
- Technical drawings and lifting plans
- Technical support from trained and experienced engineers
